

Statement

The spaces we inhabit have the most fundamental impact on our lives of any design. Zaha Hadid said, "Architecture is really about well-being. I think that people want to feel good in a space... On the one hand, it's about shelter, but it's also about pleasure." For me the pleasure follows beauty in function.

Carefully planned and thoughtful creations also have the capacity to respond with compassion to the various crises our globe is currently faced with - I feel that this is the duty of good design. People will always need functional shelter from the elements, a space where they feel comfortable and secure, this is not limited to dwellings, as social care facilities, workplaces and a range of programs need to be considered.
